

AT&T Park Becomes First Ballpark in California Where Fans Can Fully Charge an Electric Vehicle During a Game

September 17, 2012

Four New Public Electric Vehicle Charging Stations Unveiled at San Francisco's EV Week

SAN FRANCISCO--(BUSINESS WIRE)-- Today the City of San Francisco, the San Francisco Giants, [ChargePoint®](#) and [ABM](#) (NYSE:ABM), a leading provider of integrated facility solutions, unveiled four new electric vehicle (EV) charging stations at AT&T Park. The stadium is the first ballpark in California to offer public access to Level 2 electric vehicle charging stations, a next-generation technology that can charge an EV in four hours, or about the length of a baseball game.

According to the [San Francisco Department of the Environment](#), San Francisco now boasts a total of 110 charging stations at 42 locations across the city — more charging stations per capita than any other city in California.

"San Francisco is the Innovation Capital of the World and the EV capital of the world, because we have focused on building the infrastructure needed to make electric vehicles a viable choice for the public," said Mayor Ed Lee. "The installation of charging stations at AT&T Park, and another 100 on public property for all to use throughout San Francisco, will help reduce our dependence on foreign oil and create a more sustainable environment, while creating jobs."

"Our San Francisco Giants lead the division in wins, and have now beefed up their environmental batting average by having the division's first up-to-date EV-ready stadium," said Melanie Nutter, Director of the San Francisco Department of the Environment. "Supporting new EV infrastructure provides ease and accessibility to electric vehicle owners and is part of our ongoing commitment to making San Francisco the most sustainable city."

ABM installed and will maintain the charging stations, and is offering the public free EV charging at the AT&T Park stations throughout the week of September 17-21. For availability or to locate other charging stations check out ChargePoint's [online tools](#) and [mobile applications](#). ABM has installed over 100 ChargePoint EV charging stations throughout Northern California and ChargePoint is the largest online network of independently owned charging stations operating in more than 14 countries.

"ABM has been part of the San Francisco community since 1909," said Brett Knox, senior vice president of marketing at ABM. "We're proud to work with the Giants to bring these state-of-the-art ChargePoint charging stations to AT&T Park, and to help San Francisco achieve its sustainability goals."

The charging stations mark another sustainability milestone for AT&T Park, which in 2010 became the first Major League Baseball park to receive LEED Silver Certification for Existing Buildings, Operations and Maintenance.

"AT&T Park's sustainable features, including solar panels, energy-efficient concession stands — and now the EV charging stations — not only have a positive impact on the environment, but also enhance the fan experience at the ballpark," said Alfonso Felder, senior vice president of facilities, who oversees ballpark operations for the Giants. "Giants fans will now have a quick and convenient way to charge their electric vehicles while they enjoy a baseball game."

The launch of the EV charging stations coincides with the kickoff of [EV Week](#) in San Francisco. On September 17-18, the public will have the opportunity to test drive the newest EV models from a variety of manufacturers and view educational exhibits about electric vehicles at Justin Herman Plaza.

About ABM

ABM (NYSE:ABM) is a leading provider of integrated facility solutions. Thousands of commercial, industrial, government and retail clients outsource non-core functions to ABM for consistent quality service that meets their specialized facility needs. ABM's capabilities include expansive facility services, energy solutions, commercial cleaning, maintenance and repair, HVAC, electrical, landscaping, parking and security, through stand-alone or integrated solutions. With revenues exceeding \$4 billion and nearly 100,000 employees deployed across the United States and international locations, ABM delivers custom facility solutions to diverse sites across multiple industries — from healthcare, government and education to high-tech, aviation and manufacturing. ABM Industries Incorporated, which operates through its subsidiaries, was founded in 1909. For more information, visit www.abm.com.
