

ABM Health Selected to Provide Healthcare Technology Services for Memorial Healthcare System

July 17, 2013

ABM to enhance efficiency through CE-HIT integration

NEW YORK--(BUSINESS WIRE)-- [ABM \(NYSE:ABM\)](#), a leading provider of facility solutions, announced today that ABM Health has been awarded a long-term contract to provide clinical engineering and healthcare technology support services for Memorial Healthcare System (MHS) in Hollywood, FL. MHS is the second-largest public healthcare system in the country and highly regarded for its delivery of exceptional patient and family-centered care.

ABM Health is part of ABM's Healthcare Support Services business that joins together three healthcare services leaders —ABM Health, Healthcare Parking Systems of America (HPSA) and HHA Services, which provide a range of clinical engineering & healthcare technologies, environmental services, facility management, patient observation, food service, hospitality, parking and security.

Under the partnership, ABM Health's technology solutions team will assist MHS in developing a clinical engineering infrastructure that can effectively support the assimilation of its advanced technologies. Particularly, ABM Health will help prepare MHS strategically and operationally to address complex and integrated medical technologies, along with reorganizing and professionally developing the MHS in-house clinical engineering staff. The result will be a more balanced service approach using in-house resources and self-insurance rather than heavy reliance on costly manufacturers' service contracts. The new five-year partnership comes on the heels of a two-year consultative relationship in which ABM Health helped lay the foundation for MHS's evolving clinical engineering management program.

"Healthcare systems across the country have a great opportunity to streamline operations, improve patient care while reducing the long-term costs associated with the proliferation of integrated technologies," said Michael Argir, ABM Health Executive Vice President. "At the same time, these technologies are increasingly complex and ensuring that they are implemented and operated in the most efficient manner is a significant challenge. We're proud that Memorial Healthcare System has chosen to partner with ABM Health during this critical phase."

ABOUT ABM

ABM ([NYSE: ABM](#)) is a leading provider of facility solutions with revenues exceeding \$4 billion and 100,000 employees in over 350 offices deployed throughout the United States and various international locations. ABM's comprehensive capabilities include facilities engineering, commercial cleaning, energy solutions, HVAC, electrical, landscaping, parking and security, provided through stand-alone or integrated solutions. ABM provides custom facility solutions in urban, suburban and rural areas to properties of all sizes — from schools and hospitals to the largest and most complex facilities, such as manufacturing plants and major airports. ABM Industries Incorporated, which operates through its subsidiaries, was founded in 1909. For more information, visit www.abm.com.
