

ABM Named Among Barron's 100 Most Sustainable Companies for Second Consecutive Year

May 31, 2024

NEW YORK, May 31, 2024 (GLOBE NEWSWIRE) -- ABM (NYSE: ABM), a leading provider of integrated facility services, infrastructure solutions, and parking management, today announced it has been named by Barron's as among the 100 Most Sustainable Companies for 2024. This is the second consecutive year ABM has been named to the list, which recognizes outstanding environmental sustainability performance among the 1,000 largest publicly traded companies in the United States.

"With environmental sustainability a top priority for us and many of our clients, we are thrilled to once again be named one of the 100 most sustainable companies in the United States," said Scott Salmirs, President and Chief Executive Officer of ABM. "This recognition is a testament to our unwavering commitment to developing innovative solutions and integrating environmentally sustainable practices across our operations, ensuring we embrace our role of responsibly taking care of the people, spaces, and places that matter most."

One of the world's largest providers of facility services and solutions across the U.S., U.K., and Ireland, ABM has designed solutions to support client sustainability and carbon neutrality plans, including:

- Providing on-site renewable electricity generation and storage sources
- Energy-reducing facility infrastructure upgrades
- Comprehensive electric vehicle and fleet charging design, infrastructure, and maintenance
- Supporting zero-waste certifications processes
- Using environmentally certified supplies that meet green building certification requirements
- Turnkey microgrid power solutions

Barron's collaborated with Calvert Research and Management, a leader in sustainable investing, to evaluate the largest publicly traded companies by market value. The thorough evaluation process included ranking each company based on its performance for five key constituencies – shareholders, employees, customers, community, and the planet – and analyzing over 230 sustainability performance indicators.
